EXHIBIT "A"

A. Right.

- 2 | Q. There was never a time you were out there
- 3 | overnight?
- 4 | A. No, no.
- 5 | Q. so you were staying in a hotel at the time?
- 6 A. Right.
- 7 | Q. Where were you staying?
- 8 A. It was in Barnegate Light, Barnegate, New
- 9 Jersey. I can't remember the name. Oh,
- 10 yeah, it's the Quarter Deck is the name of
- it, the hotel I stayed at.
- 12 Q. Where was the job site?
- 13 A. Barnegate Light in New Jersey.
- 14 Q. What were you doing precisely?
- 15 A. We were putting stone around the lighthouse
- because the lighthouse was caving in in the
- 17 water.
- 18 Q. So you were working from the barge to do
- 19 that?
- 20 A. Right.
- 21 Q. So every morning you'd drive from the hotel
- 22 to the dock?
- 23 A. Correct.
- 24 | Q. Get in the tugboat and the tugboat would take

you out to the Wood I?

2 A. Right.

1

5

15

16

1.7

18

19

20

21

22

23

- 3 Q. And you would work on the Wood I doing the 4 job around the lighthouse?
  - A. Right.
- 6 Q. And then the tugboat would come and get you at quitting time?
  - A. You have to have a boat standing by Coast Guard regulations.
- 10 | Q. Okay.
- 11 Where exactly would the tugboat be?
- 12 A. Right along the port side.
- Q. Can you describe for me specifically the work that you were doing?
  - A. I was running the wenches. I was a mate engineer. I did the mate work which is running the wenches and the engineer, I took care of all of the engines on the rig.
  - Q. Okay.
    - A. And then I would have to run the little boat to run back and forth to pick up any crew members that wanted to come. Or we have safety guys that have to come out, and I would go out and pick them up and bring them

- 1 back. Or if the captain or superintendent
- 2 | wanted to come out, I would have to pick them
- 3 up.
- 4 \ Q. And that's on the gunny?
- 5 A. No, that's on the little skiff it's called.
- 6 | O. Is there a name for the skiff?
- 7 | A. No, it's a skiff.
- 8 Q. Did you tell me that the Wood I is a crane
- 9 barge?
- 10 A. Yes.
- 11 | Q. So there was someone there operating the
- 12 crane?
- 13 A. Right.
- 14 Q. Who was that?
- 15 A. Joseph Knowlton. It's K-n-o-w.
- 16 Q. He's the crane operator?
- 17 A. Right.
- 18 Q. Is there someone that tags the crane, signals
- 19 | the train -- crane?
- 20 A. I'm the guy who tells him when to start
- 21 loading the barge and, yeah, which is the
- 22 mate.
- 23 Q. So you use these hand signals to --
- 24 A. I have a radio and the hand signals, yeah.

- If I'm on the deck and he can't hear me
  because the engine's running, I give him hand
  signals.
  - Q. And take me, someone who's never been out there and never seen it, take me through your day, you know, how does that work? Are you --
  - A. You would go on board and where I'm the mate, I would have to go in and start up all the engines because I was also the engineer.

    I'd have to start up all the engines, get all the air pressure going.
  - Q. These are the wenches?

1.0

- A. The wenches and the crane. I would have to start the crane and the wenches and get all the pressure up before we do anything. And let him know when we can do anything. And he would load up the rock on the side of the barge.
- Q. And how would you let him know?
- A. Usually he would be down with me. He was having his coffee and I would tell him go ahead, you have pressure.
- Q. And do you have any responsibilities with

```
58
 1
           regard to the crane after he begins --
 2
      Α.
           No.
 3
          -- the work?
      0.
 4
      Α.
          No.
 5
          You don't direct him or anything like that?
      Q.
 6
          No, no.
      A.
 7
          Does he need anybody to direct him?
 8
          No, he has a roped off area. No one's
      A.
 9
          allowed near it.
10
          So he's just doing his thing with the crane?
      Q.
11
      Α.
          He's just going, right.
12
          Well, who else is on the barge during these
13
          operations?
14
          You want names?
      Α.
15
          Give me positions and then names.
      Q.
16
          Positions, okay. Kenny King, he was the
      A.
17
          captain.
1.8
          And these names that you're giving, are these
      Q.
          -- Cashman uses these names or are these the
19
          union names?
20
21
          Some of them are.
      A.
22
                   MR. ROSENTHAL: Objection to form.
23
          Some of them are Cashman guys I guess. Some
     A.
24
          of them are union guys. Is that what you
```

1 mean?

- 2 Q. Like on a Coast Guard ship, you know, like a merchant marine?
- 4 A. Right.
- 5 Q. You've got people with positions and are recognized by the Coast Guard?
- 7 A. Right.
- 8 Q. So you're saying he's the captain --
- 9 A. Right.
- 10 | Q. -- of the barge?
- 11 | A. He's the captain of the barge.
- 12 Q. And I'm just wondering if that's what Cashman calls him as well, the captain?
- 14 A. Right, they sent him as a captain.
- 15 Q. And let me ask you, are all the guys over 16 there union guys?
- 17 A. Yeah, I didn't meet any that weren't. There
  18 are some company guys, but they don't work
  19 with us. Company guys aren't allowed to work
  20 with our equipment.
- 21 Q. That's what I was going to say. You wouldn't
  22 work alongside a non union man --
- 23 A. No.
- 24 Q. -- would you?

- 1 A. No.
- 2 | o. or a woman?
- 3 A. Right.
- 4 | O. So Kenny King was the captain?
- 5 A. Yeah. And --
- 6 Q. And he's the guy hired through the union just
- 7 | like you were, right?
- 8 A. Yes.
- 9 Q. And generally speaking, what does he do on
- 10 | the barge?
- 11 | A. Tell me what to do. He tells everybody what
- 12 to do. I mean, he would try to help out when
- 13 he can.
- 14 | Q. Right.
- 15 A. I mean, he does a lot of paperwork I'm sure.
- 16 I've never been a captain, I don't know.
- 17 | O. So he's not a laborer?
- 18 A. He helps.
- 19 Q. Okay.
- 20 A. Yep, he helps when he can.
- 21 Q. Who else we got?
- 22 A. You got the Frankie Pilate. And he's a
- welder.
- 24 Q. What would he do on the barge?

A. Welding.

14

15

16

17

18

19

20

21

22

23

- 2 | Q. How much welding needed to be done?
- 3 | A. He did welding everyday.
  - 0. For what?
- A. Well, he always ended up with busted spud
  wells or a bit that's going to come apart so
  you got to weld it.
  - Q. Oh, this is for maintenance of the barge?
- 9 A. Maintenance, constant.
- 10 | Q. That was his job?
- 11 A. His job, right. Weld all day.
- 12 Q. So he's not directly involved in these 13 repairs on the lighthouse?
  - A. Yeah, well, he -- when a barge would come alongside, he's got to be there to help grab lines. You know, it takes more than one guy to tie up a barge.
  - Q. You're saying when another barge would come alongside your barge?
    - A. Right. When my barge would come alongside a flat barge to load the stone on, we would need guys to, you know, tie up the barge alongside of us so the operator can load it.
  - Q. So he'd help out with that?

A. Right.

1

13

14

15

18

19

20

21.

22

- 2 | Q. Who else would help out with that?
- A. The guys on the tugboat gunny, they would help.
  - Q. Who else is on the barge working with you?
  - A. That's -- well, on this crew, that was it.

    Usually there would be two or three more
    guys, but that's it. I did the mate and the
    engineer's job.
  - Q. So on this particular job, it was three of you that were assigned to the barge?
  - A. Three of us that were always on the barge, right.
  - o. How did you get along with these other guys?
  - A. I got along fine with them.
- 16 Q. No problems with them?
- MR. ROSENTHAL: Objection to form.
  - A. I mean, we had our arguments, you know, just like anybody else. You basically live with these people for months on end.
    - Q. Fair to say anything they did or didn't do caused your accident?
      - MR. ROSENTHAL: Objection.
- 24 A. Well, I mean, yeah, I don't know. I don't

know what you mean by that question. 1 didn't go out there and sink the boat on me. 2 Let me ask you a little bit more about what 3 0. you actually did on the barge. 4 So as the engineer, you were 5 responsible for the machinery on the barge? 6 Right. All the engines. 7 A. How much of your time did that take up? 8 Q. Four or five hours a day. 9 A. 10 Okay. 0. Some days more. Some would break, of 11 A. course. I'd have to get it fixed. 12 What other things did you do on the barge? 13 0. Repairs to the bucket that picks up the 14 A. I fueled everything. I had to take 15 care of all the fuels. Run the wenches, to 16 move the barge back and forth. 17 How much of your time would those tasks take 18 0. 19 typically? Eight or ten hours a day you worked, 20 A. depending on the day. 21 And you mentioned that Frank would handle 22 Q. lines if another barge came alongside? 23

Yeah.

A.

- 1 | Q. Did you have to do that as well?
- 2 | A. Oh, yeah, absolutely.
- 3 | O. How often would that occur?
  - A. Usually twice a day. You'd load one and we'd take it away on the tugboat. And then he'd bring another one. You'd load two, try to load two a day and you'd get out there and dump two, bring it along.
  - Q. So this is the barge that's the receptacle for the stone?
- 11 A. Right.

5

6

7

8

9

1.0

12

18

19

20

21

22

- O. And those barges are towed by --
- 13 A. A tugboat.
- 14 Q. And that's a separate tugboat than the gunny 15 that's --
- 16 A. No, same tugboat.
- 17 Q. The gunny would be --
  - A. They would set up an anchor system. Put the barges out on an anchor. And if it was too far, you know, go pick up one and bring it in and then take the loaded one and bring it back out just to complete cycle all day?
    - Q. And that's when you would assist in --
- 24 | A. Grabbing lines, right.

- 1 | O. Have you ever been in the merchant marine?
- 2 A. No.
- 3 Q. Have you ever held a Coast Guard license?
- 4 A. No.

13

14

15

- 5 Q. You never worked as a captain?
- A. I run tugboats, but I don't need to have a license. As long as there's a captain on board with a license, I can run the boat.
- 9 Q. And who have you run tugboats for?
- 10 A. Jay Cashman. I worked with a couple of captains for him.
  - Q. Let's get to the day where you got hurt. Do you remember what day of the week it was?
    - A. I thought it was Tuesday, but it's not. I believe it's Thursday, I believe it was. I'm not sure.
- 17 Q. Did you have set hours working there?
- 18 A. Yeah, you would show up at eight -- seven in the morning.
- 20 o. What was quitting time?
- 21 A. Whenever we got done unloading the barge.
- 22 Q. What time would that typically be?
- 23 A. Anywhere from five to seven.
- 24 O. P.M.?

- 1 | A. Five p.m., right. Five p.m. to seven p.m.
- 2 | Q. What time of day did you get hurt at?
- 3 A. Between -- I can't really -- between ten and
- 4 eleven.
- 5 | Q. In the morning?
- 6 A. Right, a.m.
- 7 Q. So let me ask you this: You showed up for
- 8 work at seven a.m. --
- 9 A. Right.
- 10 | Q. -- in your typical fashion?
- 11 A. Yes.
- 12 | Q. Nothing special about that day, was there?
- 13 A. No.
- 14 | Q. Up until at least you got hurt?
- 15 A. Right.
- 16 Q. The tugboat takes you out to the barge?
- 17 A. Right.
- 18 Q. And you begin starting up the crane?
- 19 A. Right. I fuel everything before I start an
- 20 engine. I fuel the crane, then I fuel mine
- 21 | -- I start the crane so he can get going. I
- start him up and then I fuel my wenches and
- anything that needs fuel. And then I start
- 24 my stuff up to get the air going and then you

- wait and you start, you know, you start your work.

  What did your work consist of that day after
  - A. That day we were talking. They're either called shanks for the bucket and we were cutting them off, using a torch. Cutting the shanks off, getting them ready for the new shanks and new bolts we were getting in.
  - O. And what specifically is a shank?
- 11 A. It holds the teeth onto a bucket.

you did those tasks?

- 12 Q. And you were cutting these with a torch?
- 13 A. With a torch, right.
- 14 Q. And I'm just trying to get a feel for your
  15 day then. How long does it take to get the
  16 machinery up and running?
- A. As long as it's not too cold out, 35, 40 minutes roughly.
  - Q. So on this day what time approximately did you begin cutting the shanks with the torch?
- 21 A. Probably about 8:30, 9:00 we were cutting.
- 22 Q. Okay.

4

5

6

7

8

9

1.0

19

20

23

24

A. We had the new shanks and new bolts coming.

So I was called to go do that, to go get them

1 on the skiff.

- 2 | O. You were called on the radio?
- A. I was called on the radio. I didn't take the call. It was Kenny King that took the call.
- 6 0. okay.
- 7 A. I went I had the welder. He cuts. He's
  8 in charge of all that. He goes out and help,
  9 you know, get the job done. And —
- 10 | Q. well, let me just slow it down.
- 11 | A. I know.
- 12 Q. It's difficult when you're not there to visualize the whole thing.
- 14 A. Right.
- 15 Q. So Kenny King takes the call on the radio, 16 right?
- 17 A. I believe it was either his radio or Nextel.

  18 But, yeah, he was the one that told me.
- 19 Q. Who would have been contacting him?
- 20 A. His last name is Weber. He's the superintendent, I can't remember his name.
- 22 Q. But he's back on land?
- 23 A. The superintendent is, yes. The captain was on board.

- Q. What was the message from shore?
- 2 A. He told me that they were going to get the
- parts and they'd let me know when they came
- 4 in to get the parts.
- 5 Q. Okay. So on shore they were getting some
- 6 parts?

1.

- 7 A. Right.
- 8 Q. And that they were going to contact you when
- 9 they came in?
- 10 A. Right, to pick them up.
- 11 Q. And the parts specifically were what?
- 12 A. They were shanks and nuts and bolts.
- 13 Q. For the bucket?
- 14 | A. For the bucket.
- 15 Q. At approximately what time did the call come
- in from shore that the parts were available?
- 17 A. They hadn't. I had gone out to drop off the
- safety man, he was going to get lunch.
- Because it takes a while to get him to shore.
- 20 And then for him to drive 30 minutes to go
- buy lunch because we were out in the boonies.
- 22 And then as I was coming back, I wish I could
- remember his name. Anyway, the
- superintendent waved me over and said, I have

- the parts you need. So I went over to the shore and picked them up.
- Q. Okay. So just to go through this slowly.

  When the call came in from shore that Kenny

  King or whoever took, you weren't on the

  barge at that time?
- 7 A. I was on the barge, but I didn't take the call. I was outside cutting.
- 9 Q. But at some point irrespective of the call,10 you went to for a lunch run?
- 11 A. Right.
- 12 Q. And mentioned the safety man?
- 13 A. Right.
- 14 Q. Who is that?
- 15 A. I don't know his name.
- 16 Q. Is that someone who works on the barge?
- 17 A. He doesn't work on the barge. He just
  18 stands by to make sure no one does anything
  19 bad.
- 20 Q. He'd probably call it work, though.
- 21 A. Yeah, right, work, yeah.
- 22 Q. Is he a union guy, too?
- 23 A. No.
- 24 Q. Is he a Cashman guy?

- 1 A. Cashman hires out safety people, right.
- Q. He's just there to watch and make sure no one does anything unsafe?
- 4 A. Yeah.
- 5 | Q. Is that the extent of his job?
- 6 A. That's it.
- 7 | Q. How do you get that job?
- 8 A. I don't know. I asked him.
- 9 | Q. He wasn't telling I bet.
- 10 A. No.

- 11 Q. The people who at any time were present on
  12 the barge on the date that you -- of your
  13 injury, you told me all of them. Are there
  14 any other people?
- 15 A. They weren't on the barge, they were on the boat. They weren't actually on the barge.

  17 They were other guys and I don't know all their names.
  - Q. The safety man is on the barge?
- 20 A. The safety man wasn't he was on the
  21 barge, yeah. That was my fault. I forgot
  22 his name. I hardly ever saw him. I can't
  23 remember his name. Yeah, I brought him to go
  24 do his lunch thing.

- Q. And I'm just a little uncertain of the chronology. When you took him in the skiff to go get lunch?
- 4 A. Right.
- 5 | Q. Where is the skiff located?
- 6 A. It was on the starboard side of the dredge.
- 7 | Q. Tied up alongside the dredge?
- 8 A. Right.
- 9 Q. And that's there on a daily basis?
- 10 A. It's always there, yeah.
- 11 Q. What's the purpose of the skiff?
- 12 A. To run people back and forth like I told
  13 you.
- 14 | O. Like little errands?
- 15 A. Right.
- 16 Q. But you don't use that skiff to get out to
- 17 the barge?
- 18 A. To work.
- 19 Q. In the morning?
- 20 A. No, no.
- 21 | Q. Why is that?
- 22 A. It's too small for that many people to get
- on it. You're talking -- I mean, it has four
- inches of free board and you don't put that
